PROFESSIONAL SUMMARY

- Over 5 years of experience as a BI Consultant / Data Analyst in large environments such as T-Mobile, Visier and Colliers.
- Experience working with Big Data and Analytics:
 - **T-Mobile:** Develop and maintain Power Bi dashboards using a distributed system that contained multiple instances, with billions of records in many tables. Developed and maintained custom ETL pipelines with Python/SQL.
 - **Visier INC:** Developed and maintained the data warehouse for various fortune 500 companies using Visier proprietary ETL technology.
 - **Colliers:** Extensive experience working for the consulting team, and market intelligence in the data preparation for the quarterly industrial market reports using SQL Server and Power BI.
- Strong English writing skills with the ability to create clear and concise technical documentation.
 - **T-Mobile:** Lead business to business conversations to address data discrepancies, gather requirements and present findings.
 - **Visier INC:** Created and presented technical documentation for customers to outline the functionality and architecture of their application.
 - **Visier INC:** Created internal documentation that captured challenges and workarounds during the development process. This documentation is now used for new hire onboarding and training of developers.
 - **Colliers:** Documented test cases, captured test results and created bug reports using the web application Jira.
- An excellent communicator who possesses the ability to be a true bridge between technical and functional teams.
- Holds a Master of Administrative Science and a Bachelor of Economics.
- Hard-working, self-starter and a dedicated teammate.
